HELISEAL[®] FLUID PROPULSION SYSTEM

Our patented water control system achieves an average 40% water savings, making this feature perfect for well environments that must meet water requirements and operators looking to streamline completions operations. Only the HELISEAL[®] delivers fewer barrels per minute, lower total volume, and less flowback and disposal.

- + HELISEAL[®] is only available on Boss Hog, Boss Refrac, and Boss Dummy.
- + Average 40% less water for pumpdown
- + High pulling force to tow guns up steep inclines
- + Run at speeds up to 563 ft/minute, even in long laterals
